LEARNING & TEACHING PEDAGOGY

PRACTICAL EDUCATION | APPLIED EDUCATION

WWW.GENIUSEDUCATIONS.COM

During the 1960s, Edgar Dale theorized that learners retain more information by what they “do” as opposed to what is “heard”, “read” or “observed”. His research led to the development of the Cone of Experience. Today, this “learning by doing” has become known as “experiential learning” or “action learning”

The VARK model of learning styles suggests that there are four main types of learners: visual, auditory, reading/writing, and kinesthetic. The idea that students learn best when teaching methods and school activities match their learning styles, strengths, and preferences grew in popularity in the 1970s and 1980s.
